

How Bucketlist Works

Recognize. Reward. Retain.

For Your People: Recognize, Celebrate, and Redeem

Employees and managers give public shoutouts to peers through a company-branded social feed. Every recognition can include points, a customizable form of currency funded by the company. These points make appreciation tangible and can be redeemed for rewards—creating a powerful loop:

- Recognitions appear in a shared feed where teammates can like, comment, and engage
- Points are awarded at the moment of recognition and accumulate over time
- Employees redeem points for rewards that matter to them: Amazon products, gift cards, experiences, or even tree-planting donations

For Admins: Configure, Automate, and Scale

Set custom point budgets and define recognition rules by team, role, or department

Launch award programs using pre-built industry templates—or create your own in minutes

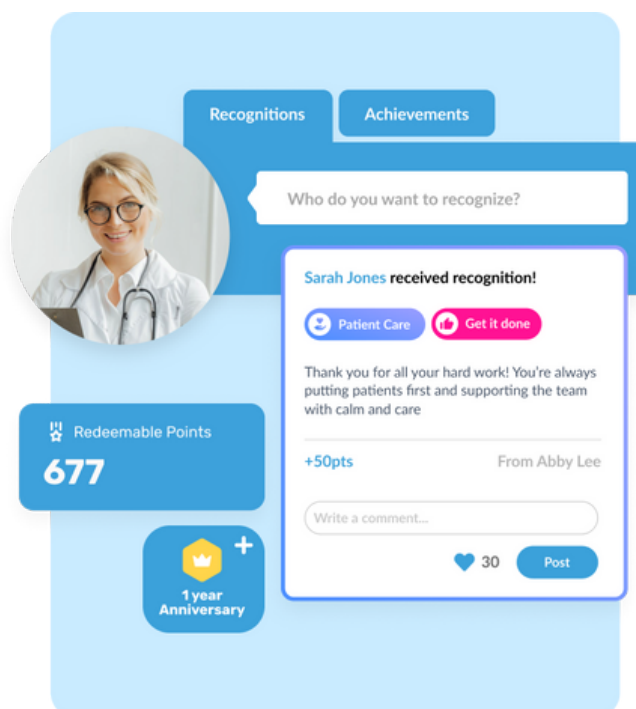

Run nomination-based campaigns for DEI, culture, or performance awards

Track participation, engagement, and reward trends with real-time dashboards

Automate everything: milestone awards, budget resets, approvals, and reminders

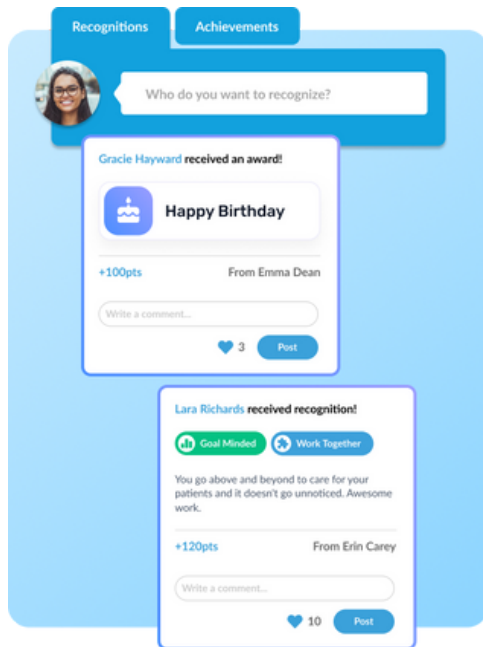

Deploy company-wide with mobile apps, Slack/MS Teams integration, and language localization

Everything is designed to save you time while giving you full control and visibility.

A Step by Step Look at How Bucketlist Works

1. Set Budgets & Define Your Program

Admins configure the rules—and Bucketlist takes care of the rest.

- Set monthly or weekly “points to give” budgets for employees and managers
- Assign value to points (e.g., 100 Kudos = \$10) and give them a custom name
- Enable core value tagging and recognition categories
- Tailor rules by department, region, or role
- Set approval flows for awards or custom recognition types

💡 *Unused “points to give” reset monthly. Points earned by employees never expire.*

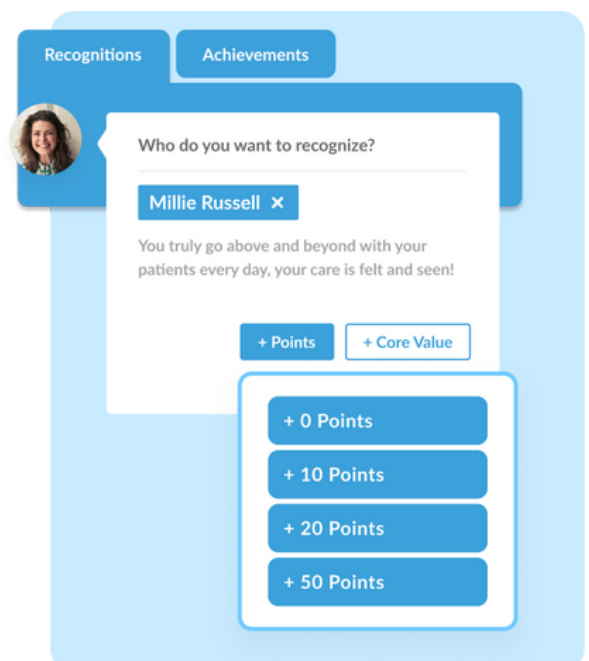

2. Celebrate Great Work with Points-Based Recognition

Make recognition visible, meaningful, and part of the daily workflow.

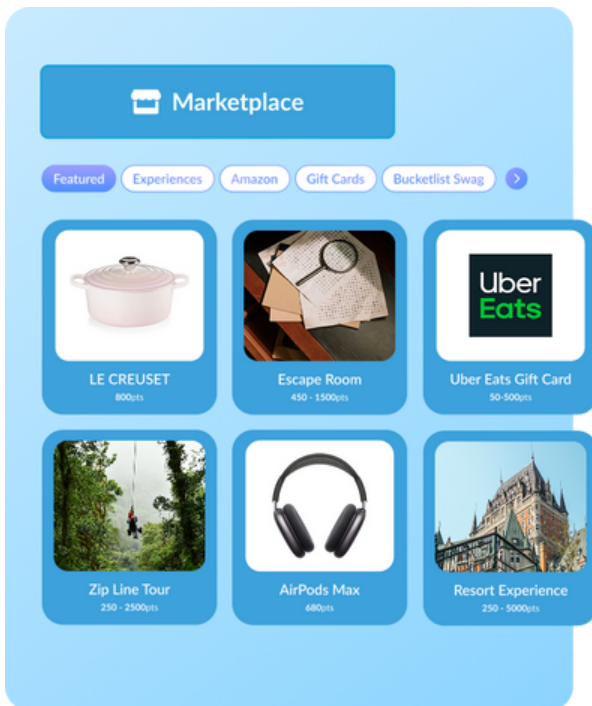

- Give recognitions with attached points from assigned budgets
- Tag recognitions with core values or goal-based behaviors
- View recognitions in a live company feed
- Engage with likes, comments, emojis, and notifications

🎉 *It's like social media—for celebrating work.*

📱 *Works perfectly for frontline and mobile teams with native apps and Slack/MS Teams integrations.*

3. Redeem Points for Experiences, Gifts & More

Make appreciation tangible with rewards people love.

Employees use their points in a curated rewards marketplace—managed entirely by Bucketlist.

- Amazon Business (US/Canada): Shop directly with free shipping—no gift cards required
- Gift Cards: 1,000+ brands in 200+ countries
- Experiences: Adventures, wellness, and dining via Viator/Expedia
- Company Swag & Custom Perks
- Evergreen: Redeem points to plant real trees and support sustainability
- Location-Based Filtering: Employees only see rewards relevant to their country

 Admins don't handle fulfillment—we manage the entire rewards backend for you.

4. Launch Awards with Industry-Specific Catalogs

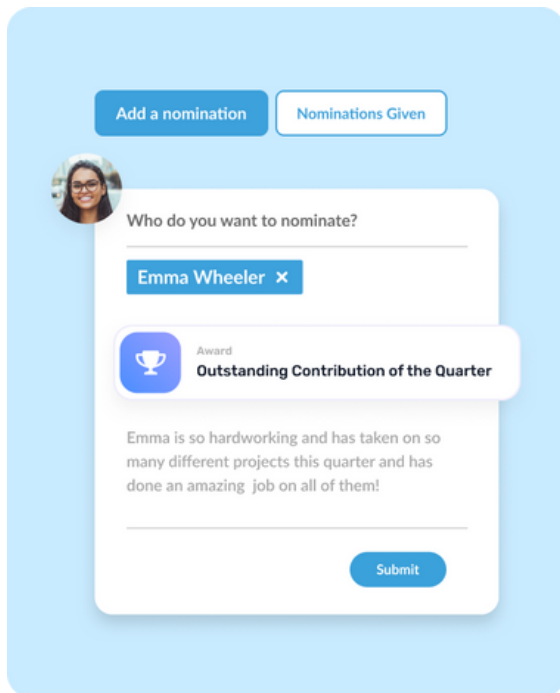

Run structured awards programs with minimal effort.

- Access a catalog of ready-made awards tailored to industries like healthcare, logistics, tech, and education
- Launch awards for safety, performance, retention, wellness, and more
- Attach points or rewards to each award
- Set rules, criteria, and visibility in minutes

 You don't need to start from scratch—we've already built what works.

5. Run Nominations to Spotlight Excellence

The screenshot shows a nomination form on a light blue background. At the top, there are two buttons: "Add a nomination" and "Nominations Given". Below these is a profile picture of a woman. The form asks "Who do you want to nominate?" and has a dropdown menu showing "Emma Wheeler" with a close button. Below the dropdown is a trophy icon and the text "Award Outstanding Contribution of the Quarter". A text box contains a nomination: "Emma is so hardworking and has taken on so many different projects this quarter and has done an amazing job on all of them!". At the bottom right is a "Submit" button.

Let employees and managers nominate colleagues for outstanding work.

- Launch company-wide or team-based campaigns
- Use custom themes like "Culture Champion," "Above & Beyond," or "Living Our Values"
- Enable peer nominations, manager approvals, or voting workflows
- Spotlight winners in the feed or all-hands meetings
- Attach point rewards or gifts to nominations

🏆 *Nominations highlight unseen efforts and promote inclusive recognition.*

6. Track Results with Robust Reporting

Get full visibility into how your program is performing.

- Real-time dashboards for recognition and reward activity
- Participation reports by department, team, or location
- Budget tracking, point usage, and reward redemptions
- Custom reporting exports for leadership updates or board decks

📊 *Recognition becomes a strategic, measurable investment.*

7. Accessible Anywhere: Web, Mobile & Integrations

Make it easy for employees to participate, no matter where they work.

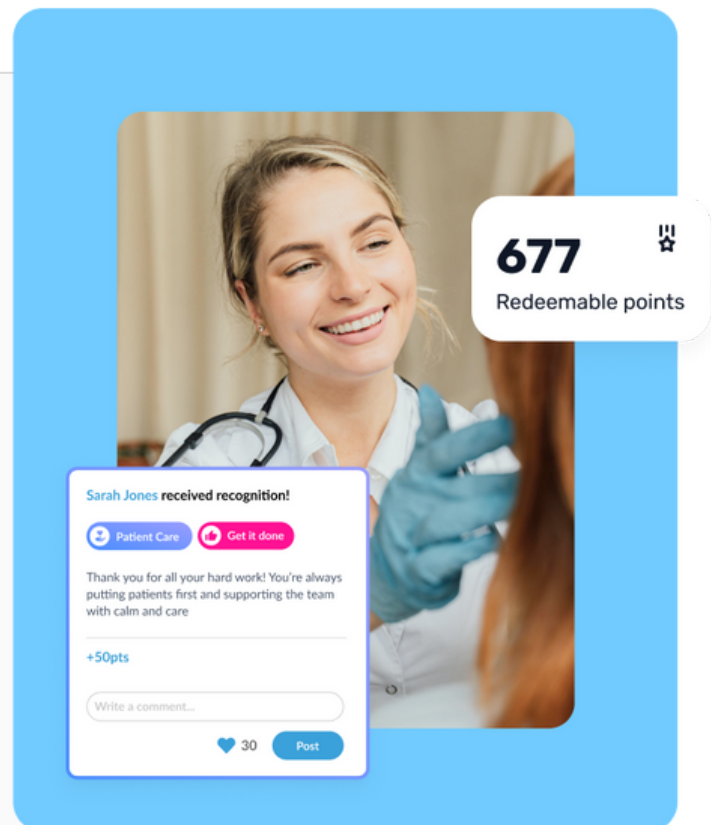

- Native iOS and Android apps
- Slack, MS Teams, Outlook, and Gmail integrations
- HRIS sync (e.g., Workday, BambooHR, ADP) and SSO
- Fully localized: supports multiple languages and currencies

 *Frontline, desk-based, or remote—recognition is just a tap away.*

Built for Healthcare & Frontline Teams

Bucketlist is loved by healthcare, retail, and field-based teams because it's:

- Accessible on any device—no desktop required
- Simple to launch with minimal admin time
- Packed with award templates for safety, retention, and peer-to-peer impact
- Designed for unionized and shift-based reporting structures
- Supported by a 9.5 NPS onboarding and support team

🌱 8. Designed for HR Teams: Easy to Launch, Easy to Scale

Set it up once. Let it run. Optimize as you grow.

- White-glove onboarding in days, not months
- Dedicated CSM and responsive support
- Custom branding and workflows
- Enterprise-grade security, uptime, and data privacy

🤝 You're not just buying software—you're getting a long-term recognition partner.
